

Why should I consider a regular M.Optom course after Bachelors in Optometry?

Embarking on a journey towards higher education is a crucial decision, and we believe that a full-time M.Optom course at Nagar School of Optometry is the right path for you. As you may have experienced the challenges of the real world, opting for a part-time or distance course might seem tempting, but it's essential to consider the potential pitfalls.

The National Commission for Allied and Healthcare Professions Act, 2021, emphasizes the importance of comprehensive education, and a full-time course ensures you are not compromising on quality. Published surveys indicate that Optometrists with post-graduation are more adept in various specialties and enjoy better earning prospects than their graduate counterparts.

At Nagar School of Optometry, we prioritize practical training, integral to all optometry specialties in our curriculum. This approach strikes a balance between theoretical understanding and hands-on skills, nurturing competent graduates.

Post-graduation, job security is paramount, and our robust industry network facilitates suitable placements, ensuring a seamless transition into the professional realm. Generous stipends are provided for PG Optometry students, alleviating financial concerns and allowing a greater focus on academic pursuits.

Choosing our regular course ensures effective learning with real-world application, paving the way for a brighter future. Embrace this journey with us for a fulfilling and successful career in optometry.

As per the [University Grants Commission \(UGC\) rules, the MSc Optometry program is not available via Open & Distance Learning mode¹². The practical work and learning, which are crucial parts of this MSc specialization, necessitate regular mode¹².](#)
